PEA Pain Relief

Palmitoylethanolamide (PEA) is a naturally sourced compound clinically researched and proven effective for the relief of chronic pain and inflammation. This natural single-ingredient option is worthy of exploration for management of chronic pain.

Palmitoylethanolamide was first discovered by Czech researchers in the 1950s, and studied extensively by Dr. Rita Levi Montalcini, winner of a Nobel Prize for her work in neurobiology and her discovery of nerve growth factor (NGF). This extremely effective and natural active ingredient has regularly been a part of new scientific publications.

PEA inhibits the release of inflammatory cytokines like interleukins 1 β and 6 as well as tumor necrosis factor-alpha (TNF- α), which helps reduce stress and pain. It also targets receptors of the innate cannabinoid system of the body which leads to analgesic effects. Its main benefits are reaching a broad spectrum of chronic pain conditions, making it a versatile option for different kinds of pain, from aches in the joints to gastric-related pains.

New Roots Herbal's PEA Pain Relief is naturally sourced from non-GMO safflower oil. Once extracted, this highly therapeutic compound is micronized; this process of physical milling creates microscopic particles, which improve accessibility to tissues in need. Each plant-sourced capsule contains 600 mg of potency-validated palmitoylethanolamide to easily meet therapeutic dosage recommendations.

Make Life Better · newrootsherbal.com

Each vegetable capsule contains:

Micronized palmitoylethanolamide
(*N*-(2-hydroxyethyl)hexadecanamide)
(from safflower seed oil) 600 mg

Other ingredients: Vegetable magnesium stearate and silicon dioxide in a non-GMO vegetable capsule composed of vegetable carbohydrate gum and purified water.

#3092 · 60 vegetable capsules

V0751-R1 · NPN 80113092

Directions of use:

Adults: Take 2 capsules daily or as directed by your health-care practitioner.

Duration of use:

Consult a health-care practitioner for use beyond 3 months.

Manufactured under strict GMP (Good Manufacturing Practices).
